

Multi-Factor Authentication Policy

Company: Stellar Clothing

Owner: IT/Security Team

Effective Date: 5/1/2026

1. Purpose

This policy defines how Multi-Factor Authentication (MFA) is used to protect Stellar Clothing's information systems, networks, devices, and data.

2. Scope

This policy applies to:

- All employees, contractors, and vendors
- All remote access to company systems
- All accounts used to access company data, applications, and networks

3. Policy Overview

MFA is required to verify user identity before granting access to company systems. This applies to both company-owned and personal devices used for work.

MFA must combine at least two of the following:

- Something you **know** (password or PIN)
- Something you **have** (phone, authenticator app, hardware key)
- Something you **are** (fingerprint or facial recognition)

4. When MFA is Required

4.1 Remote Access

- MFA is required for all remote access, including VPN and cloud systems
- Users cannot bypass MFA when working offsite

4.2 Sensitive Systems

MFA is required for access to:

- Payroll and HR systems
- Financial systems
- Inventory and supply chain platforms
- Customer data systems

4.3 Administrative Access

- All IT and security administrators must use MFA for every login
- Elevated privileges require MFA re-verification during sessions when prompted

5. Approved MFA Methods

The company supports the following MFA options:

- Authenticator apps such as Microsoft Authenticator or Google Authenticator
- Push notifications sent to a registered mobile device
- Hardware security keys such as YubiKey
- Biometric login (if supported by the system)

Not Allowed:

- SMS text message codes
- Email-based verification codes

6. Device Requirements

- Users must register at least one MFA method before accessing systems
- A backup authentication method is strongly recommended
- Personal devices must have a lock screen enabled (PIN, password, or biometrics)
- Lost or stolen devices must be reported immediately

7. User Responsibilities

Users are responsible for:

- Keeping their MFA devices secure
- Never approving login requests they did not initiate
- Reporting suspicious login attempts or repeated MFA prompts
- Not sharing authentication credentials or devices

8. IT and Security Responsibilities:

The IT/Security team is responsible for:

- Enforcing MFA across systems
- Managing user enrollment and reset requests
- Monitoring login activity for suspicious behavior
- Responding to security incidents involving authentication

9. Exceptions

- MFA exceptions must be approved by IT/Security
- Exceptions will only be granted for valid business reasons
- Temporary exceptions must have an expiration date

10. Enforcement

- Users who do not comply with this policy may lose access to company systems
- Repeated violations may result in disciplinary action

11. Policy Review

This policy will be reviewed periodically and updated as needed based on:

- Changes in technology
- Security risks
- Business needs

12. Acknowledgement

All users must acknowledge that they have read, understood, and agree to comply with this policy.
